

## Senior Backend Engineer (Node.js) (m/f/d)

Since the foundation in 2017, MindDoc has developed into Germany's leading provider of video-based psychotherapy.

In addition to video-based psychotherapy, MindDoc also operates a mental health app that has been downloaded onto smartphones by over three million people worldwide.

With our customised offer, we encourage people to take their mental health into their own hands. We make help and support easily accessible. Anytime, anywhere and for everyone.

You can expect a warm and committed team with a start-up mentality, who together and with great passion will do everything they can to raise awareness of video-based psychotherapy and the digital health application and achieve our company goals.

Join the MindDoc team and make psychotherapy and digital health applications easier and more accessible for more people!

### As a Senior Backend Engineer (Node.js) (m,f,d) at MindDoc you...

- Will work with a cross functional agile team on the backend systems that power our therapy platform which is one of the leading digital applications for guided and unguided treatment for mental health.

- Writing high quality code, performing code reviews, shipping and monitoring changes is your daily work.
- Play a key role in the core strategy of the company: you are significantly responsible for our overall success.
- Contribute to an engineering culture where developers enjoy working and keep learning.

## You...

- Proven track record of building robust backend applications in agile environments.
- Have minimum 3 years of experience programming in Node.js with TypeScript.
- Have at least 6 years of experience developing backend systems using languages such as JavaScript, Java, Python or Ruby.
- Have a strong experience working with relational databases (e.g., PostgreSQL, MySQL, MariaDB).
- Have experience with cloud platforms such as Google Cloud, AWS, OTC or Azure.
- Are able to identify and solve problems with CI on Github Actions or similar tools.
- Have proficiency with Unix/Linux environments, including command-line tools and shell scripting.
- Have a solid understanding of Kubernetes and experience with basic operations and a deep understanding of Kubernetes Clusters is a plus.
- Have strong communication skills, with the ability to motivate and align team members toward shared goals.
- Are fluency in English, German is a plus.

## You can expect...

- First and most important for us: A meaningful job. Digitizing mental health and helping thousands of people daily is not easy, but when it works it is incredibly meaningful
- A carefully crafted balance between a digital health startup with flat hierarchies, a self-dependent way of working, clear-cut communication, and speed on the one hand and a strong, stable and family-owned hospital group as our 100% shareholder on the other hand provides a unique combination of innovation and flexibility + a stable and safe job
- 30 days of vacation
- Work remotely, come to the office in Berlin or Munich whenever you want

- sponsored lunch
- VIP treatment in Schön Klinik's portfolio, pension plan, and child care
- Company bike lease options
- Employee discounts with more than 600 different brands
- EGYM Wellpass
